

VACANT PROPERTY SECURITY

Properties that become vacant are immediately vulnerable to unlawful intrusion, whether it is to squat, vandalise or steal valuable materials.

The consequential costs can be considerable, both in terms of delays in selling / letting the property and financial losses to evict squatters.

VACANT PROPERTY SECURITY SOLUTIONS

Steel Security Screens

Pre-fabricated (folded), high security, heavyweight steel screens are designed to cover existing windows and openings.

Perforated steel sheet may also be used, hand-cut on-site, to fit awkward or difficult opening shapes such as recessed arched/ church windows or large sliding doors.

Keyless Security

The Clearway keyless door is the only steel security door in its class to be both Police and Insurance approved.

No keys - no hassle; our keyless steel door allows controlled access via unique codes.

Monitored Alarms

The Clearway Solo Alarm operates independently of power or telephone lines and is designed to be left unattended for long periods of time.

Typically, the alarm can be installed, verified and commissioned to protect your property within twenty minutes.

Clearway is ISO accredited to: ISO9001:2015, ISO14001:2015, OHSAS18001

VACANT PROPERTY SECURITY SOLUTIONS

Concrete barriers

Concrete barriers provide highly effective perimeter security and vehicle access management.

Barriers are a highly successful way of preventing unauthorised vehicle access, reducing the risk of fly tipping and protecting against illegal occupation of land and open spaces.

Manned Guarding

Uniformed security guards patrolling an open site provide a highly effective visual deterrent against would-be intruders plus the ability to respond immediately in the event a situation arises.

Dog units provide additional security. All guards are uniformed, vetted, trained and SIA licensed professionals.

Inspections

Regular site inspections allow us to quickly identify and report all potential risks likely to arise with a vacant building.

Property inspections include comprehensive checks and photographic evidence that enable the client to be made aware of any situation that requires immediate action.

inView CCTV Tower

Our high-spec inView CCTV towers can be deployed to most environments, whether or not mains power is available, and viewed remotely online or via mobile App.

Uniquely, the inView CCTV tower provides independent video coverage of large areas via multiple remote, wireless sensors.

inView mobile CCTV

The inView mobile CCTV unit is unique to Clearway. It can be mains powered or fully self-sufficient and provides multiple fixed day/night cameras plus a high-spec pan/tilt/zoom camera fixed to a rapid-rise 6m mast with full remote-operation.

inView Verified Video

Wire-free & power-independent, interior and exterior video verified alarm system with day and night visibility cameras, providing 24/7 security.

When activated, the system sends a video clip to an alarm operator who will verify if a response is needed.
