

## Fly-tipping and Commercial Waste

A new incident of fly-tipping occurs every 12 seconds across the UK at a cost to the public purse of around £40 million per year.

# Rubbish and waste removal

Regardless of how efficiently domestic or commercial properties are managed, the volume of waste and rubbish we produce in the UK is increasing and continues to cause many unwanted problems.

The constant battle against fly-tipping means the problem grows from being an unsightly inconvenience to attracting vermin, presenting a health risk and potentially causing fires.

If not cleared quickly, bulk fly-tipped rubbish attracts waste from more fly-tippers like a magnet, so the problem needs to be dealt with quickly, efficiently and environmentally.

Licensed by the Environment Agency, Clearway has been clearing waste and rubbish from domestic and commercial sites and properties since 1991 and are respected in the industry. From multiple bags of domestic waste to entire land sites filled with tons of rubbish, to offensive and bio-hazardous waste, we've seen it all, cleared it all and are not phased by any volume of waste.

With 30 years' experience, we continually work with landowners, local authorities and commercial organisations.

- **Private Land Clearance** – If you are a private landowner, we can safely and securely remove illegally dumped waste from your property, while working to reduce any impact the waste could have on your land through our cleanup services.
- **Public Land Clearance** – We provide safe fly-tipping clearance services for public areas such as parks and open spaces, and work with local authorities to safely remove dumped waste for the benefit of the public and local environment.
- **Hazardous Waste Removal** – Dumped waste can often contain hazardous, sharp, illegal, toxic or poisonous substances, either left illegally at a site or as a byproduct of the waste breaking down. Our teams are experienced in safely removing the majority of most common waste types, including certain hazardous waste, and delivering it to a licensed waste transfer station to be processed in accordance with current environmental regulations.
- **Village, Town and City Waste Removals** – We remove illegally dumped waste in villages, towns, cities and other urban areas, where this waste can attract rodents and pests into properties and waste can block pavements, roads and streets for residents, pedestrians and drivers.
