

Heras Temporary Fencing

2m high interlocking metal barrier

Product overview

Heras fencing is a 2m high physical, metal mesh barrier that not only provides a visual boundary but also a strong perimeter to prevent intruders from climbing over.

Heras Temporary Fencing is strong; designed to withstand the rigours of a heavy construction site for example. The wire mesh structure is purposely designed to withstand the effects of high winds and storms whereas traditional fencing panels are susceptible to the wind, causing them to shift or fall over.

The panels are easy to erect and dismantle, making for rapid installation, and meaning they can be easily repositioned around a site perimeter or vacant premises. Panels are held in place by specially designed 'feet' to keep them upright.

Why Heras Temporary Fencing?

- ✓ Fast assembly time for rapid protection for your assets
- ✓ Easy to dismantle/reposition around a site
- ✓ Conforms to certification BS1722
- ✓ Secure protection from both intruders and unauthorised vehicle access
- ✓ Corner structure: Smartweld technology for added strength
- ✓ Available in two versions, with or without the stability strut

Stability struts

Clamps

Round corner

Square corner

The HERAS fencing panels are available with round or square corner options, with or without the stability struts.

Applications

Heras fencing is suitable for a wide variety of environments/locations:

- Construction sites
- Car parks
- Vacant properties
- Preventing vehicular access
- Live events

Technical information

Specifications	
Panel size	2m high x 3.5m wide
Material	Galvanised Steel
Mesh size	262mm x 43mm
Weight (square corner)	14kg per panel
Weight (round corner)	14kg per panel
Frame tube size	38.1mm round
Corner structure	Smartweld technology
Certification	BS1722

Optional extras

Concrete Barriers with Heras Fencing

Concrete barriers provide excellent protection against vehicle intrusion but do not prevent people gaining access by climbing over.

Our concrete barriers for Heras Fencing provide the perfect solution and are designed specifically to enable 2m high standard Heras Fencing to be locked into the barrier and secured together.

Perfect for both traffic and people management at events or live construction sites in public places, such as when additional construction work is carried out at a live public site, e.g. a shopping centre.

RAPID RESPONSE

The Clearway team can provide Heras Fencing quickly in urgent situations. Whether short-term interim measures to defend premises or assets following a break-in, or a permanent installation to mitigate an ongoing safety threat.

Call our hotline 24/7: 01322 479652

Our Heras fence barriers provide the perfect solution when you need to rent a concrete barrier integrated with fencing for crowd control. Adding extra height to a concrete perimeter may be required when security and visibility need to be balanced.

Benefits of choosing concrete barriers with Heras fencing:

- Fast assembly time.
- Creating an unbroken, impenetrable boundary.
- Secure protection from both intruders and unauthorised vehicle access.
- Interlocking fencing prevents the concrete blocks from being moved or tampered with.
